

ISAC 2.0 Documentation

This bot is responsible for tracking players in the game Tom Clancy's The Division2 or Division2.

It responds to the command:

- `/dth`

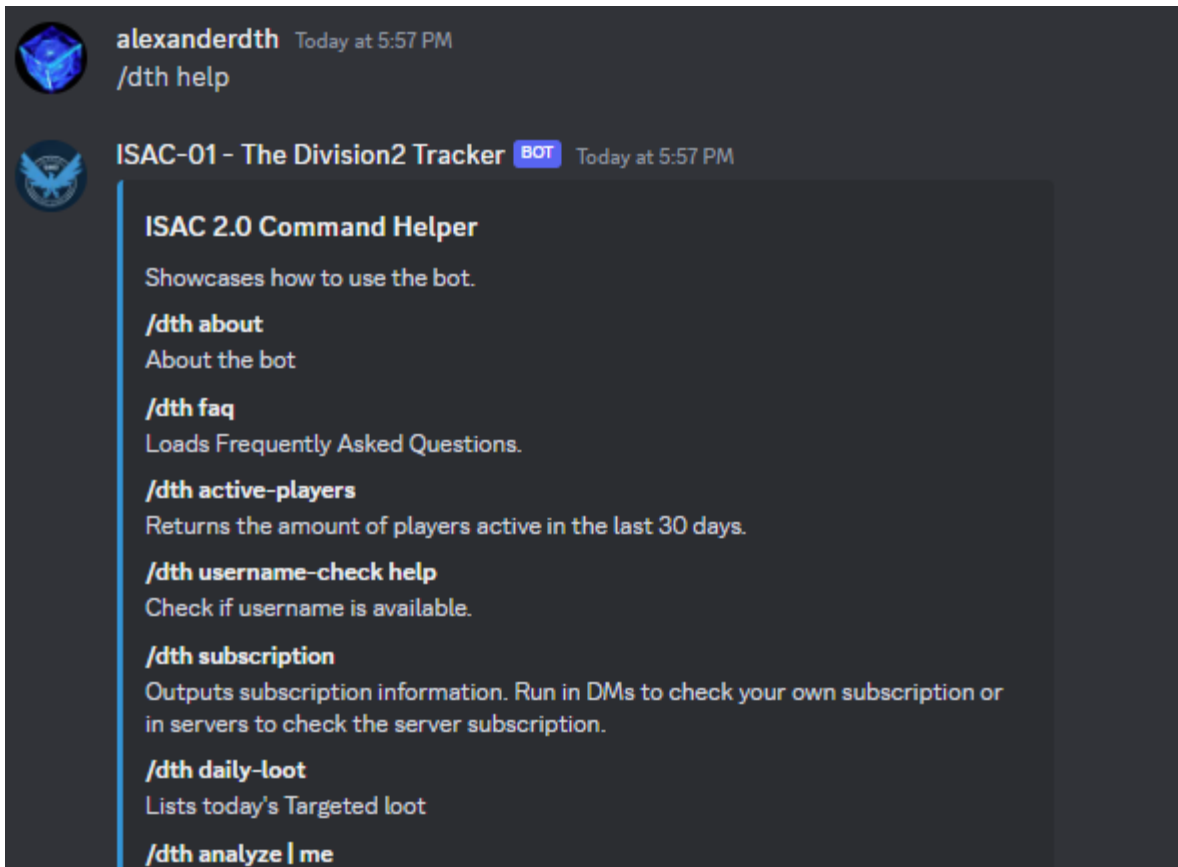

Initially you might find yourself lose, no worries, just give it a try, run: `/dth`

This is the bot replying to you and telling you that you use run: `/dth help`, as it requires a sub command from the "dth" stack.

1. The Helper

`/dth help` command, provides you with everything you need to know to get yourself started. It will showcase every command available to you.

Runs a percentage check analysis for the entire username history of a player. (PC Only)

/dth compare player1 player2

Runs a compare between 2 accounts. (PC Only)

/dth generate-password

Generates a random and secure password. Use this in private message.

/dth generate-username

Generates a list of random usernames when you want to change username.

/dth user-merits

Showcases how the merit system works.

/dth register help

Create up to 3 profiles (one for every platform), to gain access to [/dth me]command

/dth unregister help

Removes your platform account

/dth me uplay | psn | xbox

Uses your profile to query the most recent account. Saves you the hassle of always copy-ing and pasting your name.

/dth track myusername1212

Pulls account data based on username

/dth search player111

Performs a database search for accounts. Use --legacy to use pre-isac usernames.

/dth psn track username1231

Queries player data and concatenates previous accounts on Playstation

/dth xbox track username1212 / "username 123"

Queries player data and concatenates previous accounts on XBOX Live

/dth history | console

Returns your search history for either PC or console.

/dth watchlist help

Your own player watchlist.

/dth report help

Send evidence to the ISAC Staff for review.

/dth ubisoft-report cheatername123

Sends a report to Ubisoft based on the evidence stored by us.

/dth vendors help

Vendor listing and search. (rubenalamina.mx)

/dth help

Showcases all available commands

2. About

/dth about command provides you with information on who buiilt the system and what tech stack the system uses.

alexanderdth Today at 5:59 PM

/dth about

ISAC-01 - The Division2 Tracker BOT Today at 5:59 PM

About ISAC 2.0

Additional information about the Bot.

Author

This piece of software was entirely developed from scratch by alexanderdth. He is the sole owner and maintainer of it.

Purpose

No, this bot was never designed for people to show off. It started as an internal forensics tool then it got released to the public and must be treated as an investigative tool.

Features

- Player information
- Cheater Records
- Combat Analysis reports
- Stats analytics
- Account binding
- Username tracking
- Nicknames
- Comments

Notice

Most of the forensics features are exclusive to PC-only , due to the nature of the data points, but also because console does not have full blown cheats, nor is it a mess like PC is.

Platforms

Ubisoft Connect / PC, Playstation Network, xBox Live

Operating System

Ubuntu Server, Linux

Programing Languages

Python, Bash, SQL

Technogies

Division2 API, Scraping, Discord API, Discord Py

Data sources

Tracker.gg, Ubisoft Connect, Google, Wikipedia, RubenAlamina.mx

Legality

Yes, the data is 100% public, most people just don't have the means to access it.

3. FAQ (Frequently Asked Questions)

/dth faq command provides a convenient way to list information about ISAC, what people are curious about, the rules and more. Its contents are frequently updated so the image below, might not reflect it's current state.

alexanderdth Today at 6:01 PM

/dth faq

ISAC-01 - The Division2 Tracker BOT Today at 6:01 PM

Loading FAQs, please wait...

What is the ISAC Tracker Network (ITN)?

The ISAC Tracker Network is a player tracker that was originally designed to track down and log cheaters, since its inception it has grown to include an array of player statistics that players have access to totally free! Much like other stat tracking networks for other games this tracker includes the most stats of any tracker for 'The Division 2' and since TRN closed down their 'Division 1' tracker we are the ONLY one still providing this service.

It includes our own built-in method for detecting a legitimate player Vs a cheating player and whilst there has been some false positives in the past - the system has now matured with issues patched out, PvE cheaters will always obtain an impossible stat skew which will trigger our automatic systems, for PvP only cheaters or players that only 'toggle' this is where YOU come in, make sure you record ALL sus experiences and send them in to #contact-staff where the staff and other community members can work together to find out whether its a case of cheats or just weird shenanigans.

01/14/2024 3:24 PM

Who can use the system?

The system is available to all legitimate players. Players found cheating in PvP will be banned from using the bot, players found playing with cheaters in PvP will be warned and given a chance to leave, those who ignore such warnings or are seen repeatedly playing with cheaters will be marked as a 'cheater-companion' and lose their access to the bot. Help us keep the community clean, record all such instances of cheating and take screenshots of the companions, if the footage is clear and obvious we will take the necessary measures to mark said players.

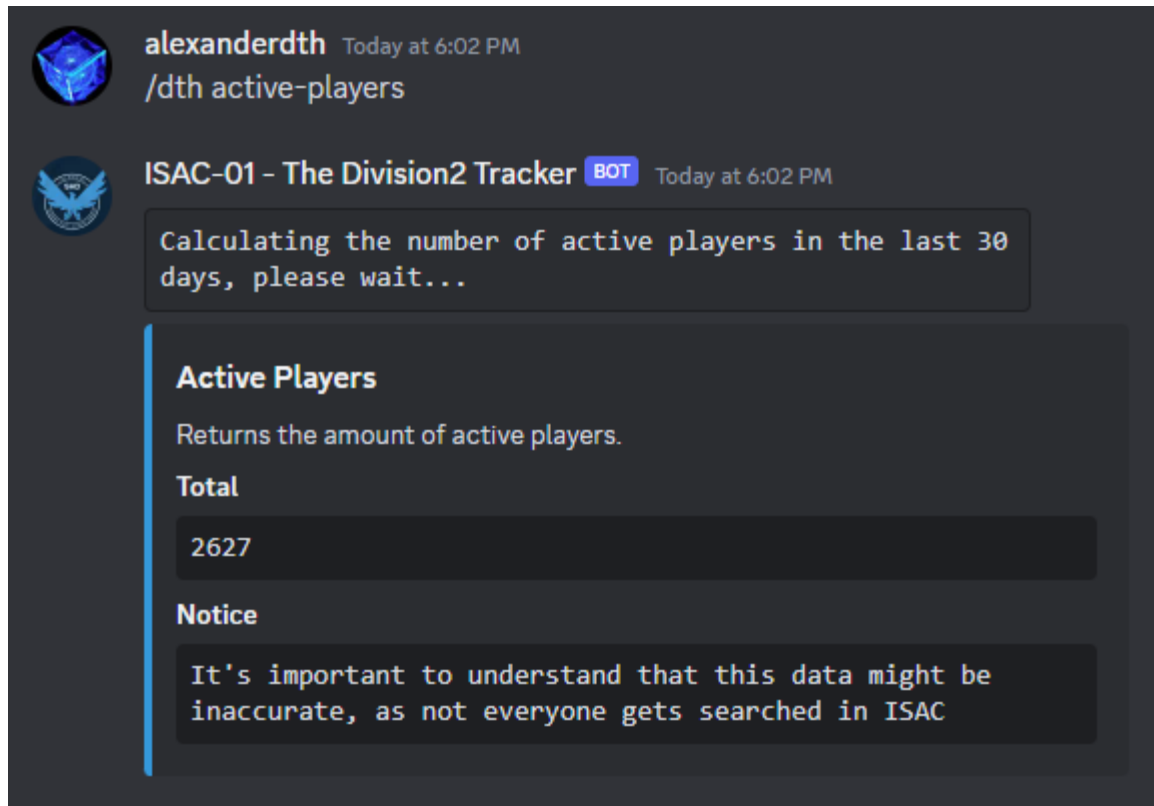

01/14/2024 3:44 PM

What is a Boosted Account?

'Boosted Account' is a term that the ISAC staff coined in order to separate active cheating players from accounts that were farmed in PvE using cheats in the past. There are people who provide boosting services for fresh or existing accounts in order to obtain all the loot or levels anyone would need. However the players playing on the accounts in PvP are legit themselves. If

4. Active Players

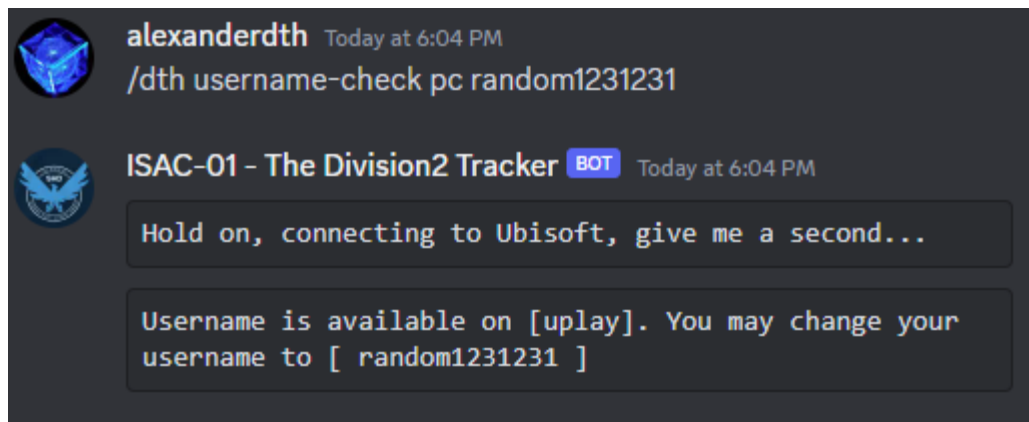

`/dth active-players` is a command which outputs a rough estimate of active players, based on local data. It's not accurate, we know, but, it's the closest thing you got for Division2, in terms of online players.

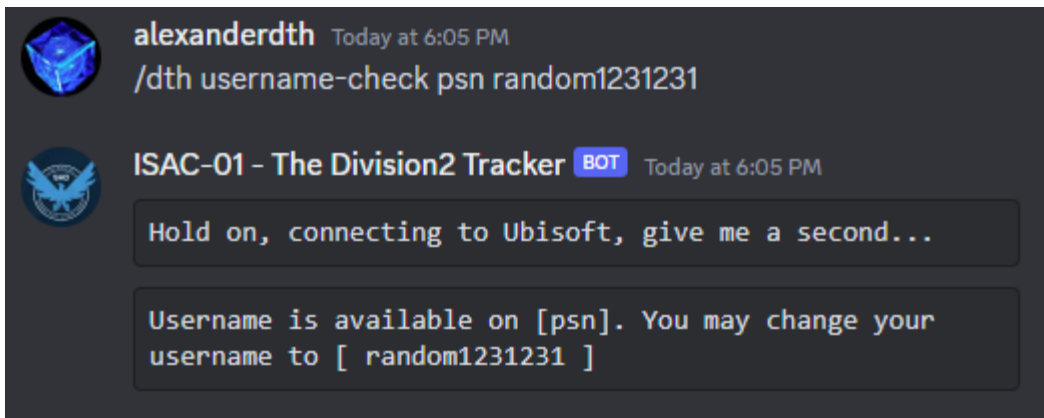

5. Username Check

`/dth username-check <insert-platform> <insert-username>` provides you with an easy way to see if the username you want to change to is available or not. As a general idea, the platform can take 3 values:

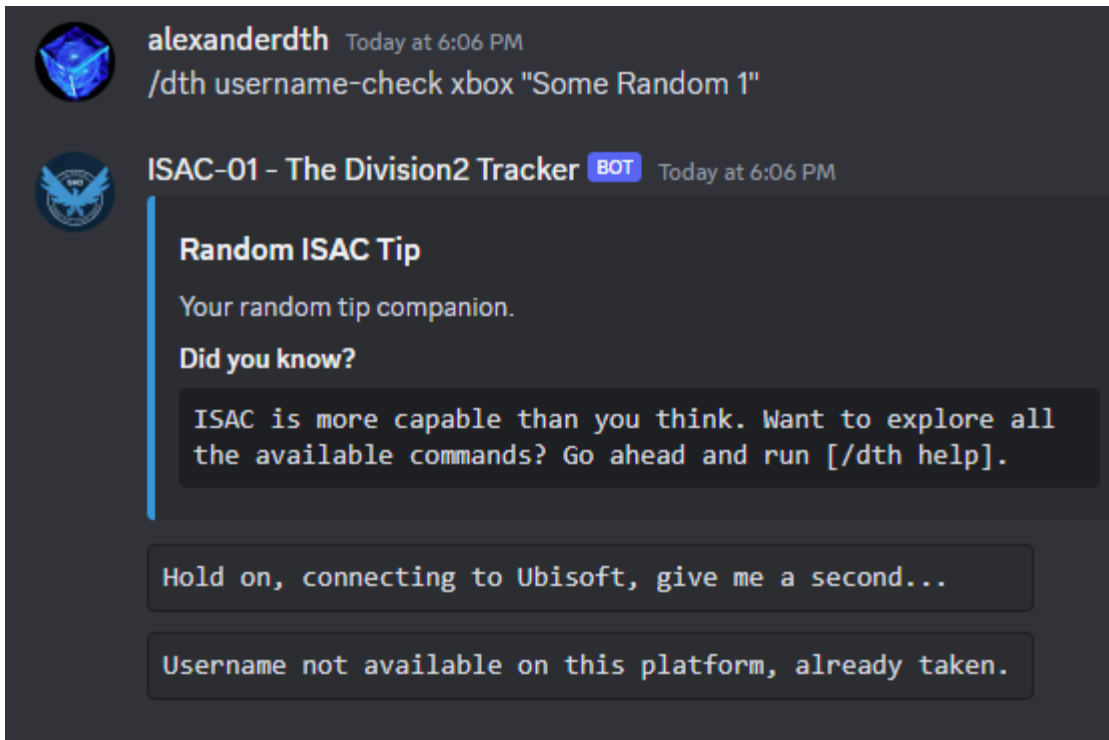

- pc:

- psn (Playstation Network)

- xbox

6. Subscription

/dth subscription will display subscription information related to ISAC. As a general idea, ISAC is free to use in it's official discord. But, in order to use it in a private server, you will have to have an active trial or subscription.

This command can be ran in 2 places:

- DMs (ISAC is indeed DMable) -> displays your user subscription info

alexanderdth Today at 6:08 PM

7. Analyze

`/dth analyze` is a command which attempts to use local data in order to perform static analysis between username changes. In pther words, every time someone changes name, their account information is logged and it's bound together by something called `uplay id`. This ID is unique and cannot be change. It's what allows the system to store username changes and bind data. Leaving this explanation asside, we can use the account snapshots to calculate differences in between them. The command can be used in 2 pars:

- `/dth analyze <insert-player-here>`, this will run it on a given player.
- `/dth analyze me`, this will analyze it for youself, assuming you have an ISAC Profile registered.

Examples:

- Self Analysis:

alexanderdth Today at 6:18 PM

/dth analyze me

ISAC-01 - The Division2 Tracker BOT Today at 6:18 PM

Random ISAC Tip

Your random tip companion.

Did you know?

ISAC works in DMs as well. Given it a shot, click on the bot and try to send it a command. It will work the same way it does in discord.

Hi, alexanderdth#0, ISAC 2.0 Player Analysis Started...

Found player: v21.

ISAC 2.0 Player Analysis Tool

Analyzes percentage increases and decreases in various player stats.

Emote.. vs. ReasnowS1. (41 days)

Weapon Hits Increased By 0.25% from 58,226,305 to 58,370,950 (2,656 hits / hour)
Headshots Increased By 1.11% from 1,595,420 to 1,613,103 (324 hits / hour)
Headshots Per Hour Decreased By -0.80% from 251 to 249
Bodyshots Increased By 0.22% from 56,630,885 to 56,757,847 (2,331 hits / hour)
Bodyshots Per Hour Decreased By -1.35% from 8,912 to 8,792
Headshot Kills Increased By 2.17% from 84,222 to 86,053 (33 hits / hour)
Pvp Kills Increased By 1.19% from 1,685 to 1,705 (0 hits / hour)
Rogues Killed Increased By 2.39% from 20,635 to 21,129 (9 hits / hour)
Npc Kills Increased By 1.36% from 285,710 to 289,607 (71 hits / hour)

8. Compare

/dth compare <insert-first-username> <insert-second-username> will attempt to compare 2 accounts, calculate a score and simply determine which score is higher. The score consists of headshots, bodyshots and crits. Of course, headshots have a 0.2 modified, since they require more skill. Example:

alexanderdth Today at 6:21 PM

/dth compare lmao-b v21.

ISAC-01 - The Division2 Tracker BOT Today at 6:21 PM

Started Player Comparison BETA, pulling data for both accounts. Give me a second...

ISAC 2.0 Comparison Engine

Runs a rough compare between 2 accounts.

LMAO-B vs v21.

The stats bellow are not a concrete indicator of the player's skills and abilities. Take the result with a grain of salt.

LMAO-B

Average HS /hour: 643
Average Bodyshots /hour: 2,980
Average Weapon Hits /hour: 3,624
Headshot Percentage: 18%
Bodyshot Percentage: 82%
BS to HS ratio: 4.63

v21.

Average HS /hour: 246
Average Bodyshots /hour: 8,074
Average Weapon Hits /hour: 8,320
Headshot Percentage: 3%
Bodyshot Percentage: 97%
BS to HS ratio: 32.82

Better player

LMAO-B with a BS to HS ratio of: 4.63

9. Generate Password

/dth generate-password is a handy command which generates Ubisoft Compliant secure passwords. (WE DO NOT STORE ANYTHING, the bot doesn't know if you chose a password or not). The command accepts one single argument which is optional, that is, password length. By default, Ubisoft requires a password which contains a maximum of 16 characters. You can generate a password with a length with up to 30. /dth generate-password 30. Example:

alexanderdth Today at 6:25 PM

/dth generate-password

ISAC-01 - The Division2 Tracker BOT Today at 6:25 PM

ISAC 2.0 Password Generator

Allows you to generate a random password for any account. We DO NOT store passwords, so all you see is what you get. Try to use this in a private message.

Notice:

You may provide a password length, although it MUST NOT exceed 30.

Example:

```
/dth generate-password 30
```

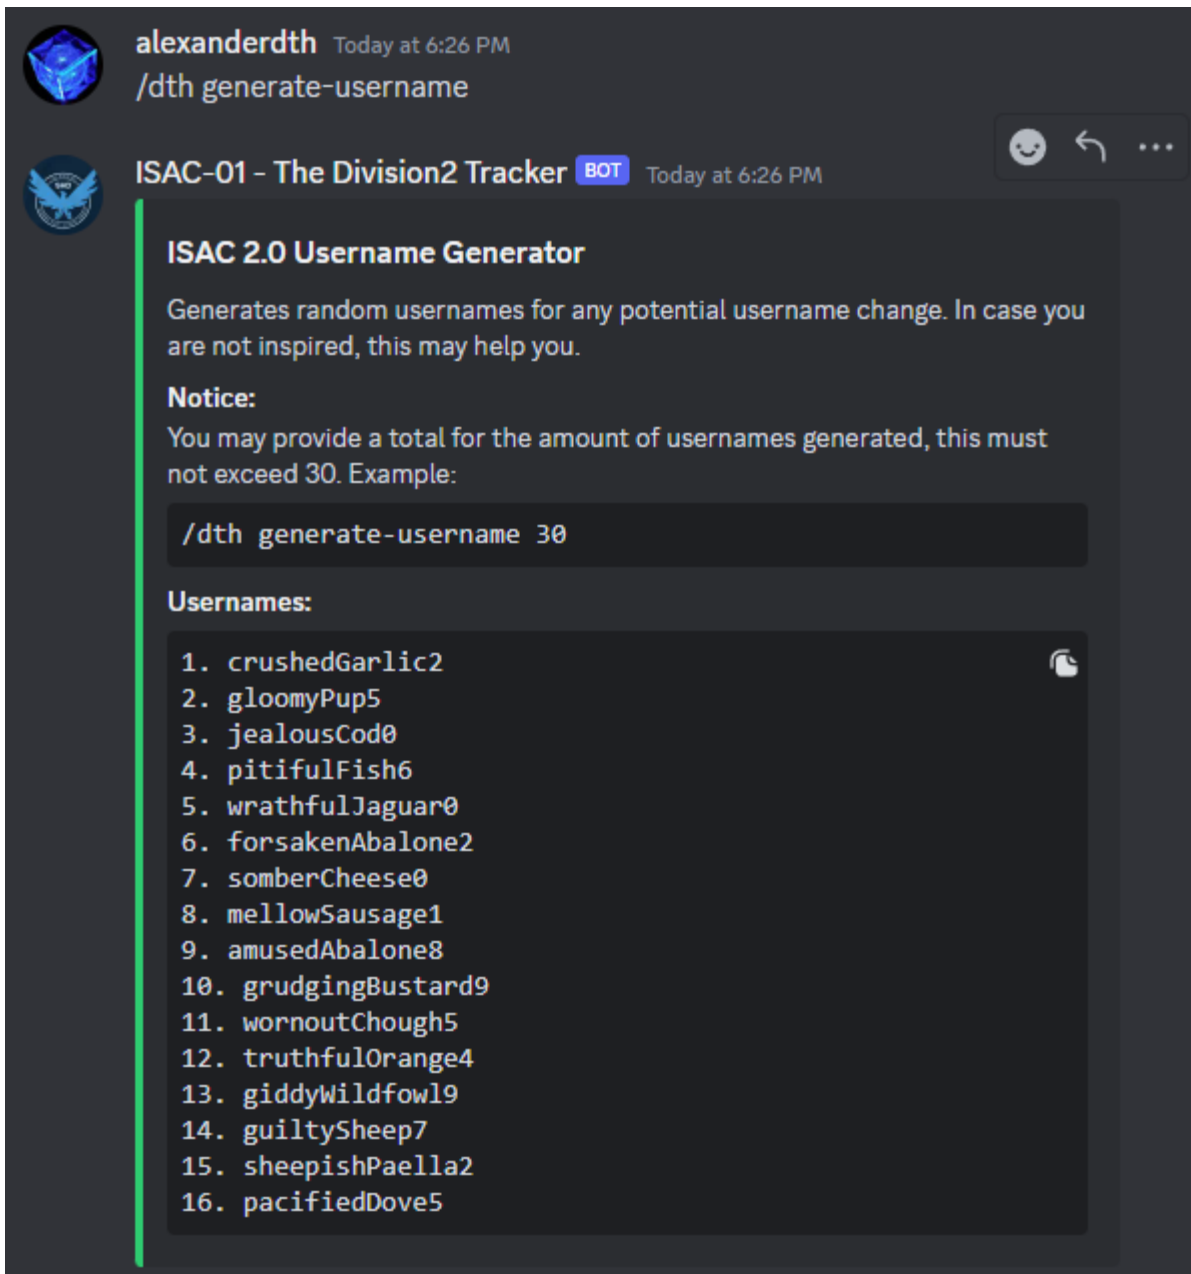

Generated Password:

```
@Jj##kq/VihW9qzf
```

As you can see it generates an extremely secure password that is almost impossible to crack and is Ubisoft Compliant.

10. Generate Username

/dth generate-username will attempt to randomly generate a list of 16 usernames, by default. You may generate a maximum of 30 per execution by doing /dth generate-username 30. Example:

11. User Merits

`/dth user-merits` is a command that showcases ISAC's merit system. The system has 2 types of merits:

- Automatic / Auto-Assigned based on player stats
- Manual / Custom (Assigned by Staff Members)

In terms of custom merits, you will see "Cheater Companion or Cybersherlock", the most predominant ones.

It's important to explain that ISAC's merit system is found on every ISAC profile, right under `Listed Merits`

Listed Merits

- [!] ISAC Admin
- Rogue Agent / Keener's Ally
- Headshot Master
- Crit Abuser
- Foam King

Running `/dth user-merits` will output:

alexanderdth Today at 6:30 PM

`/dth user-merits`

ISAC-01 - The Division2 Tracker BOT Today at 6:30 PM

Hi, [alexanderdth], displaying merit system information...

6:30 PM

ISAC 2.0 Player Merits

Explains how the merit system works.

Categories:

- automatic / auto-assigned based on stats
- custom merits / manually assigned by the admins

Auto-assigned Merits (PC):

- Rogue Agent / Keener's Ally: at least 30% of DZ playtime spent rogue
- Rogue Police / SHD's Ally: under 30% of DZ playtime spent rogue
- Headshot Master: 1,000,000+ headshots
- Crit Abuser: 2,200,000+ critical hits
- Pyromaniac: 200,000+ burn kills
- Bleeding Edge: 25,000+ bleed kills
- The Foamer: 4,000+ ensnare kills
- Technician: 150,000+ skill kills

Auto-assigned Merits (Console):

- Rogue Agent / Keener's Ally: > 30% of DZ playtime spent rogue
- Rogue Police / SHD's Ally: under 30% of DZ playtime spent rogue
- Headshot Master: 1,000,000+ headshots
- Pyromaniac: 200,000+ burn kills
- Bleeding Edge: 25,000+ bleed kills
- The Foamer: 4,000+ ensnare kills
- Technician: 150,000+ skill kills
- The Looter: 50,000+ looted items
- The Survivor: 50,000+ survivalist kills
- The White Death: 50,000+ sharpshooter kills

- Demolition Man: 50,000+ demolitionist kills
- Decorated Soldier: 3,000+ comendation score

Custom Merits (PC-Only):

- Confirmed Pedophile
- Regulus Enjoyer
- ISAC Moderator
- Strafe God
- Rogue's Lair
- DRUHH FAMILY
- Supp Diff
- Pistol Bot
- 流氓特工
- I'll Be Back
- Owner Of NMC
- Definitely Not APM
- Twitch Streamer
- Rogue
- Ice Dragon
- God Of The Mortar
- Ukrainian Legion
- Ukrainian Legion's Raid Leader
- Make-A-Wish Kid

12. Registration

`/dth register -u <insert-username> -p <insert-platform> -n <insert-nickname>`, will enable you to create an ISAC profile, which is bound to your Discord Account. This will enable you to track yourself and perform self-analysis. Here's how you can use it:

- Run `/dth register help` first, to see the helper:

alexanderdth Today at 6:33 PM

/dth register help

ISAC-01 - The Division2 Tracker BOT Today at 6:33 PM

ISAC 2.0 Profile System

How to use the functionality (Only 1 account per 1 user per 1 platform is allowed. Meaning you can have a maximum of 3 profiles.)

Usage

```
/dth register -u <your-username> -p <platform> -n  
<nickname>
```

Parameters

Check below for the full explanation of each parameter

-u <username>

Provide your current in game username. If you are on xbox and your username has spaces use "this is a username with spaces" input.

-p <platform>

Can take only 3 values: uplay, psn and xbox.

-n <nickname>

Provide your original / legacy nickname that everybody knows you by.

Example

```
/dth register -u mikeforever123 -p uplay -n  
mikeforever123
```

- Based on the helper, you can see it requires some things, in order to work. Let's break it down together:
- -u <insert-username>, requests your in-game username
- -p <insert-platform>, requests your platform. This can take one of the following values: `uplay` for pc, `psn` for PlayStation and `xbox` for XBOX Live.
- -n <insert-nickname>, requests your nickname. You can set any nickname you want.

What's important as well is that, you can create 3 profiles. One for every platform.

Now, let's try an example and see how it works:

```
/dth register -u lmao-b -p uplay -n alexanderdth
```

alexanderdth Today at 6:37 PM

/dth register -u lmao-b -p uplay -n alexanderdth

ISAC-01 - The Division2 Tracker BOT Today at 6:37 PM

Random ISAC Tip

Your random tip companion.

Did you know?

Did you know that we have a command for performing account analysis? The system logs username changes and this can be used to check for statistical increases in stats for players with at least 2 usernames indexed. Go ahead and run [/dth analyze <insert-username-here>].

Attempting to create your profile. Please wait.

ISAC 2.0 Profile System

16. Search

/dth search <insert-keyword> is basically ISAC's own version of Google. Since ISAC stores it's data in a database, it makes it possible for users to search for it. This is useful in case you do not remember a name, you're lazy or you simply want to explore what you can find. It requires a simple keyword. Contrary to /dth track <insert-username-here>, it does not require the EXACT username, instead, you provide it with a

keyword. Example:

The screenshot shows a Discord chat window. At the top, a user named 'alexanderdth' sends a message: '/dth search wokr'. Below this, a bot named 'ISAC-01 - The Division2 Tracker' responds with: 'Hi, alexanderdth, finding matches for: wokr, please wait...'. The bot then sends a large message titled 'ISAC 2.0 Search Engine Results'. This message contains a description of the search engine, a 'Notice' about using the '<track>' command, a 'Use' section with the command '/dth track <username>', and a 'Matches' section listing nine results. Each result is a numbered list item showing a username, a role in brackets (e.g., '[cheater]'), and an alias in parentheses (e.g., '(a.k.a Wokr)').

alexanderdth Today at 7:59 PM
/dth search wokr

ISAC-01 - The Division2 Tracker BOT Today at 7:59 PM
Hi, alexanderdth, finding matches for: wokr, please wait...

7:59 PM

ISAC 2.0 Search Engine Results

Finds partial username matches in the local database based on your keywords.

Notice
You may run <track> on any of the usernames found. The system will automatically pull the latest data.

Use

```
/dth track <username>
```

Matches

- (1) llllllllllll [cheater] (a.k.a Wokr)
- (2) HvH..... [cheater] (a.k.a Wokr)
- (3) hmvee.6491 [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)
- (4) LEGIT.AIMBOTER [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)
- (5) GAME.DE4D [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)
- (6) Legened.WoLF [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)
- (7) Undetected [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)
- (8) IM.BLDOZEER [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)
- (9) legebdery.. [cheater] (a.k.a wokr,Undetected) (Lag Switcher,Aim Assister)

There is an additional parameter which you can send it, `--legacy`. ISAC has a built-in method from grabbing older usernames. Some proviles have something listed on them that reads `Legacy / Pre-ISAC Usernames`. This is essentially a list of really old names auto-grabbed. You can "force" ISAC to search the database, based on these names.

- Example:

alexanderdth Today at 8:00 PM

/dth search mike --legacy

ISAC-01 - The Division2 Tracker BOT Today at 8:00 PM

Hi, alexanderdth, finding matches for: mike, please wait...

--legacy flag enabled. Will use Legacy / Pre-ISAC Usernames

ISAC 2.0 Search Engine - Results - Page: 1

Finds partial username matches in the local database based on your keywords.

Notice

You may run <track> on any of the usernames found. The system will automatically pull the latest data.

Use

```
/dth track <username>
```

Matches

```
(1) TransDontExist. (a.k.a ISAC.Moderator) (ISAC Moderator)
(2) Chris_P_dix (a.k.a bigmams)
(3) DareDevi1. (a.k.a Doctor.Strange3)
(4) Mike_Hol (a.k.a Mr.W_H_White)
(5) ToxicInhaleTT
(6) PRYMike (a.k.a UnknownHunter_)
(7) madd.d.dd [cheater]
(8) AAST.Michael
(9) ScoobyDoobyDo (a.k.a MikeHyphen)
(10) Katt0t_01 (a.k.a zilokab) (Suspicious Player)
```

ISAC 2.0 Search Engine - Results - Page: 2

Finds partial username matches in the local database based on your keywords.

Notice

You may run <track> on any of the usernames found. The system will automatically pull the latest data.

17. Playstation / XBOX Tracking

We do support consoles to some extent, hence we have 2 endpoints to use for consoles. They are:

- /dth psn track <insert-username-here>

- `/dth xbox track <insert-username-here>`

Keep in mind, since xbox contains usernames with spaces, you will have to encapsulate your username in between `"`. In other words:

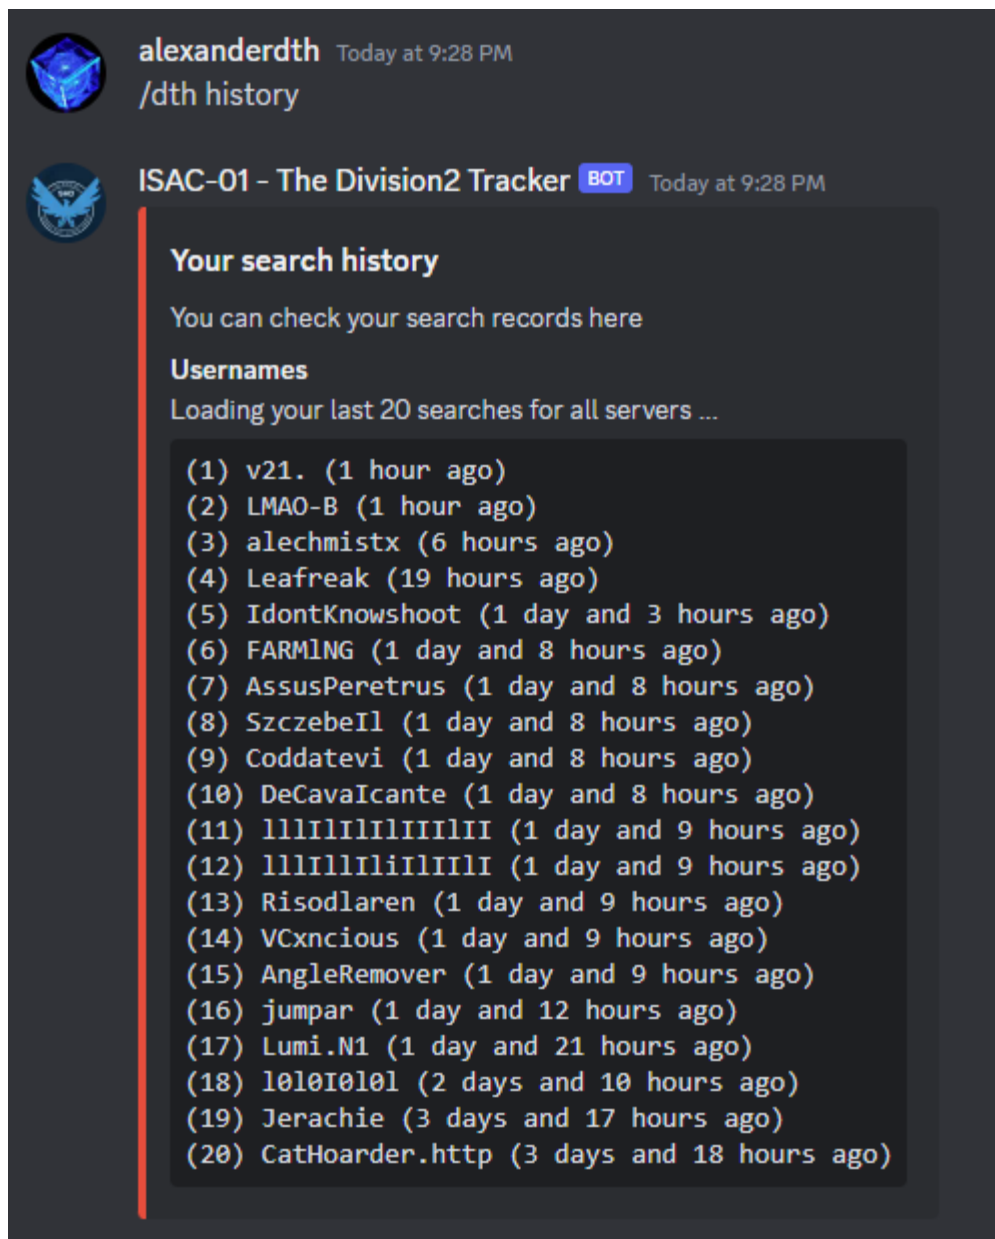

- `/dth xbox track "i am player 123"`

18. History

`/dth history` is a command which allows you to keep track of who you searched for. It's a feature that is not widely used, but know this, it's there. You may also specify the optional paramter `console`, in order to pull information.

Examples:

- In DM (Listing global searches):

The screenshot shows a Discord direct message window. At the top, a user named 'alexanderdth' (with a blue cube profile picture) sends the command `/dth history` at 9:28 PM. Below this, a bot named 'ISAC-01 - The Division2 Tracker' (with a blue eagle profile picture and a 'BOT' tag) responds at 9:28 PM. The bot's message contains a section titled 'Your search history' with the text 'You can check your search records here'. Underneath, it says 'Usernames' and 'Loading your last 20 searches for all servers ...'. A list of 20 search results follows, each with a number in parentheses, the username, and the time since the search. The list is displayed on a dark background with a light border.

alexanderdth Today at 9:28 PM

No data found. Make some searches first.

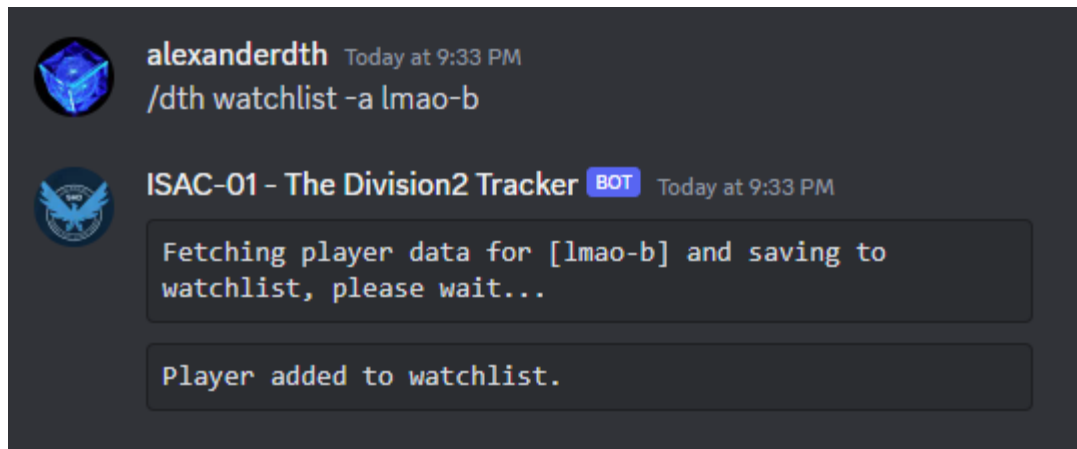

`/dth watchlist` is another obscure, but very powerful command. It's purpose is simple: store players on your personal watchlist. It's like your personal storage space. If you got people you want to keep an eye on, drop them in the watchlist.

You got a limit of 40 usernames you can store on your watchlist. It's usage is very simple:

- `-a <insert-username>`, adds a player
- `-rm <insert-username>`, removes a player
- `-all`, lists your players

Now, let's give it a try, let's add a player:

Let's list our items:

alexanderdth Today at 9:34 PM

/dth watchlist -all

ISAC-01 - The Division2 Tracker BOT Today at 9:34 PM

Loading last 40 elements from watchlist, please wait...

(1) LMAO-B a.k.a (off3n5iv3m, off3nsiv3m) (LMAO-B, TheKneeOnGFloyd, hackologist, alexanderdth, AntiTransSystem)

(2) yushan_huojian [cheater] a.k.a (yushan_huojian) (ezzzpzzz..., HvH., yushan_huojian)

(3) V1711 [cheater] a.k.a (Victor2733) (jlilililililj, V1711, Victor2733)

(4) IBoughtAim a.k.a (UnholyAlignment) (AimA_Sister, GazaSquadWipe, UrBlk_K_Y_S, IBoughtAim, SheThemTTs)

(5) ERROR-02 (ERROR-02)

(6) PytYouDown [cheater] (PytYouDown)

(7) Noobi-WanKenobi [cheater] a.k.a (only_cheats) (Maximum-Damage, CheatsAndSkills, steven.eagle, only_cheats, Noobi-WanKenobi)

(8) XCZXE [cheater] (XCZXE)

Finally, let's wipe a record:

alexanderdth Today at 9:33 PM

/dth watchlist -rm lmao-b

ISAC-01 - The Division2 Tracker BOT Today at 9:33 PM

Checking if player [lmao-b] exists in watchlist, please wait...

Player removed from your watchlist.

As you can see, the functionality is very easy to use. The information displayed includes

- current username
- username history
- player merits alongside cheater status.

20. Report

`/dth report` is the command you want to use, if you want to send us evidence. It requires a few parameters, but we'll walk you through it. Go ahead and run `/dth report help`.

alexanderdth
Today at 9:36 PM

/dth report help

ISAC-01 - The Division2 Tracker
BOT Today at 9:36 PM

ISAC 2.0 Player Report System

Explains the command line usage.
Warning: This feature is PC EXCLUSIVE.

Usage:

```
/dth report -u <username> -l <video-link> -d "description"
```

Explained parameters:
Required parameters are explained bellow to remove confusion.

-u
Username / Required argument
Example:

```
-u playernamehere
```

-l
Video Proof URL / Required parameter
Example:

```
-l https://youtube.com/this-link-is-for-cheater
```

-d
Report description / Required parameter
Example:

```
-d "This is correctly inputed description"
```

Full example

```
/dth report -u myusername123 -l https://streamable.com/buihiu121 -d "Player is lagswitching"
```

The paramters required for running this command:

- -u <insert-username>, provide the username
- -l <insert-proof>, provide the proof. Put your input in between "", if you got multiple links to send
- -d <insert-description>, provide the description. Put it in between "", if you want to send multiple words

Now, your input should look like this:

- /dth report -u lmao-b -l "youtube1 youtube2 youtube3" -d "this user is cheating his ass off"

You can also find the full example when checking the command helper.

21. Vendor Reset

/dth vendors is a really cool and useful commands. It uses data provided by RubemAlamina.mx in order to perform vendor listing and searching. The command is very rich in features so pay attention. Let's run it: /dth vendors help. This will display the helper that you see bellow:

alexanderdth Today at 9:45 PM

/dth vendors help

ISAC-01 - The Division2 Tracker BOT Today at 9:45 PM

ISAC 2.0 Vendors

Showcases usage for the vendors command.

Basic Commands:

```

/dth vendors must-buy (lists named and dz exclusives)
/dth vendors whitehouse gear/mods/weapons (lists items in white house)
/dth vendors countdown gear/mods/weapons (lists items in countdown vendor)
/dth vendors theater gear/mods/weapons (lists items in the theater vendor)
/dth vendors campus gear/mods/weapons (lists items at the campus)
/dth vendors haven gear/mods/weapons (lists items in haven)
/dth vendors benitez gear/mods/weapons (lists items at roy benitez)
/dth vendors dz-east gear/mods/weapons (lists items in dz east vendor)
/dth vendors dz-west gear/mods/weapons (lists items in dz west vendor)
/dth vendors dz-south gear/mods/weapons (lists items in dz south vendor)
/dth vendors cassie gear/mods/weapons (lists items at cassie mendoza)
/dth vendors clan gear/mods/weapons (lists items at the clan vendor)
/dth vendors castle gear/mods/weapons (lists items at castle settlement)

```

Advanced Commands:

Commands that help find and filter results based on your query.

- /dth vendors search

Runs a global search for gear and weapons based on your input

```
Example:  
/dth vendors search everyday  
/dth vendors search "everyday carrier"
```

- /dth vendors slot

```
Lists gear belonging to a certain category  
Possible values:  
- backpack  
- chest  
- kneepads  
- mask  
- gloves  
- holster  
Example:  
/dth vendors slot backpack
```

- /dth vendors talent

```
Searches for gear & weapons containing a certain talent  
Example:  
/dth vendors talent efficient  
/dth vendors talent "adrenaline rush"
```

- /dth vendors brand

```
Searches for gear belonging to a certain brand  
Example:  
/dth vendors brand golan  
/dth vendors brand "Golan Gear"
```

- /dth vendors mods

```
Searches for mods based on keywords  
Example:  
/dth vendors mods bleed  
/dth vendors mods "Pulse Resistance"
```

Don't be scared, I know it looks overwhelming, but once you use it a few times, it will feel like nothing.

There are multiple subcomands that you can use:

- `/dth vendors must-buy` -> This will return items that ISAC deems important. This includes: All exotics, All DZ Exclusives and All Named Items

Now we can dive into vendor locations, these vendor locations have 3 gear categories: gear, weapons and mods.

Logically, it looks something like this:

- `/dth vendors <vendor-location> <gear-type>`

Vendor locations:

- whitehouse
- countdown
- theater

- campus
- haven
- benitez
- dz-south
- dz-west
- dz-east
- cassie
- clan
- castle

Ger Types:

- mods
- gear
- weapons

Now, let's combine a random location with some random gear type. Say, we wanna see what gear is to sale at the castle vendor:

- `/dth vendors castle gear` -> In this example we replaced `<vendor-location>` with `castle` and `<gear-type>` with `gear`

alexanderdth
Today at 9:53 PM

`/dth vendors castle gear`

ISAC-01 - The Division2 Tracker
BOT Today at 9:53 PM

Hi, [alexanderdth], querying Castle Settlement Vendor, please wait...

Castle Vendor Gear

Name: HG Mask

Brand: Habsburg Guard

Type: Mask

Armor: 80k

Core: 124,967 Armor

Attributes: 8.5% Status Effects , 7.4% Skill Damage

Name: Jackrabbit Holster

Brand: Gila Guard

Type: Holster

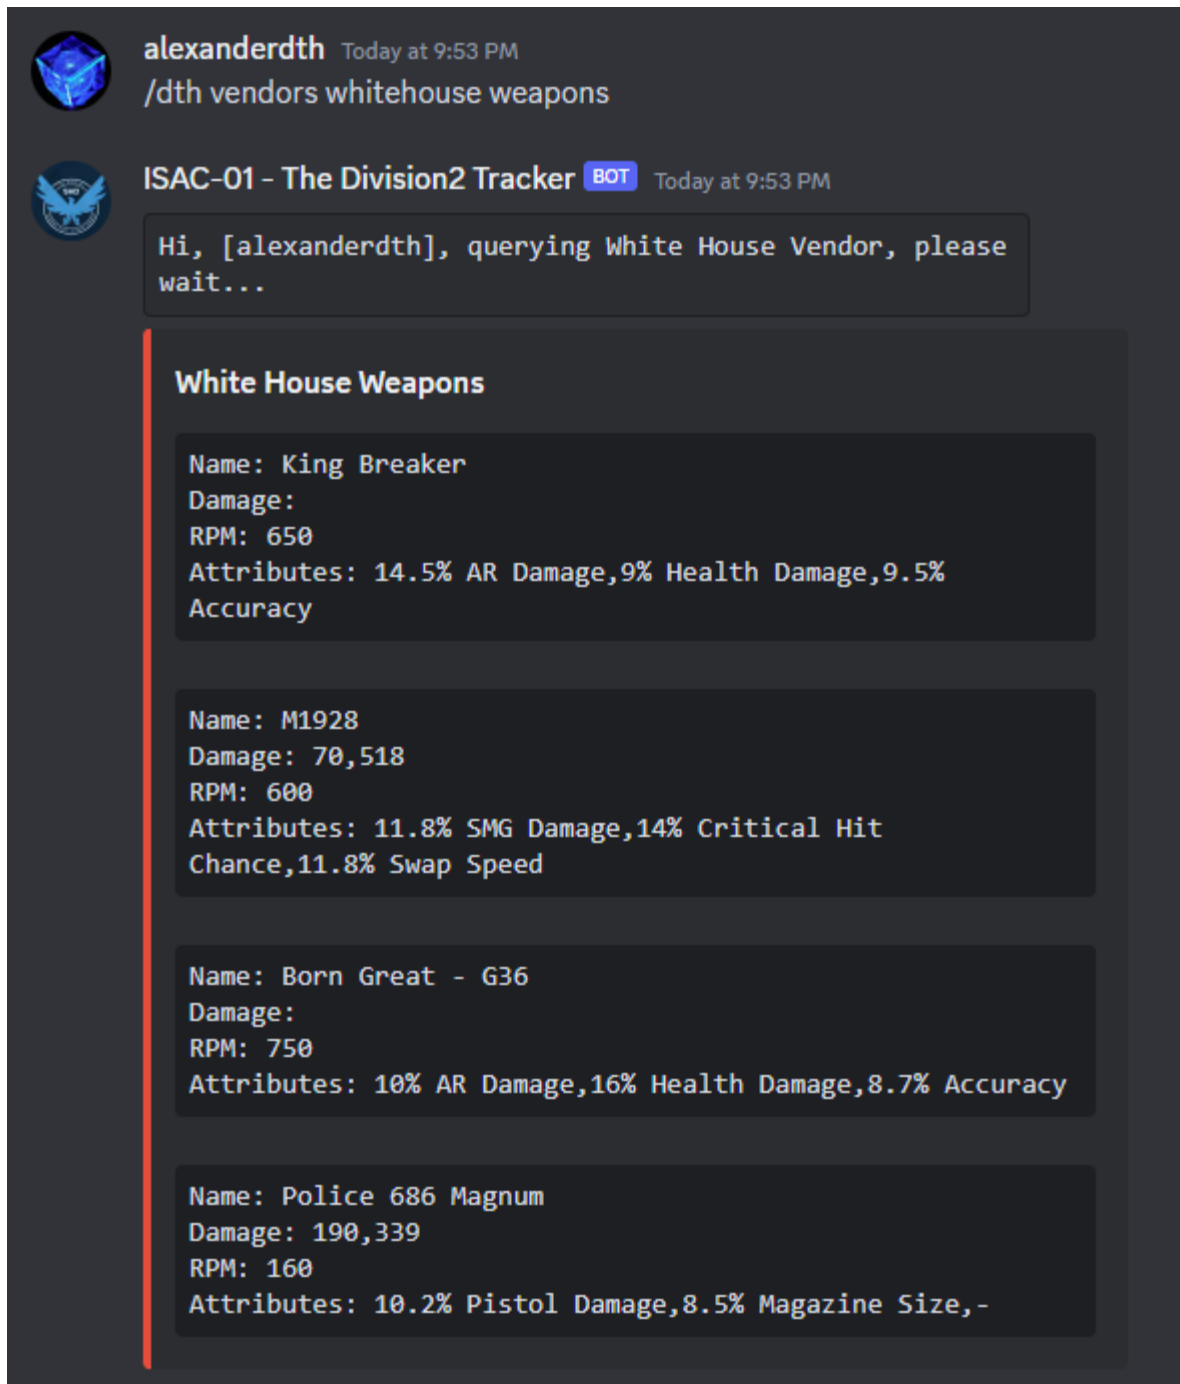

Armor: 112k

Core: 130,997 Armor

Attributes: 10.3% Critical Hit Damage , 8.6% Status Effects

Let's see what weapons are found at the whitehouse vendor:

- /dth vendors whitehouse weapons -> Same as above, we replaced the location and the gear type.

The screenshot shows a chat window with a dark background. At the top, a user named 'alexanderdth' sends a message '/dth vendors whitehouse weapons'. Below this, a bot named 'ISAC-01 - The Division2 Tracker' responds with 'Hi, [alexanderdth], querying White House Vendor, please wait...'. The bot then displays a list of weapons under the heading 'White House Weapons'. Each weapon entry includes its name, damage, RPM, and attributes.

White House Weapons

- Name: King Breaker
Damage:
RPM: 650
Attributes: 14.5% AR Damage, 9% Health Damage, 9.5% Accuracy
- Name: M1928
Damage: 70,518
RPM: 600
Attributes: 11.8% SMG Damage, 14% Critical Hit Chance, 11.8% Swap Speed
- Name: Born Great - G36
Damage:
RPM: 750
Attributes: 10% AR Damage, 16% Health Damage, 8.7% Accuracy
- Name: Police 686 Magnum
Damage: 190,339
RPM: 160
Attributes: 10.2% Pistol Damage, 8.5% Magazine Size, -

We know how annoying expertise and optimization can be, for that, we can also filter by item slot:

- /dth vendors slot <insert-slot-here>

Valid slots:

- backpack
- chest
- kneepads
- mask
- gloves
- holster

Let's put it to the test, let's try to find some gloves:

- `/dth vendors slot gloves`

alexanderdth Today at 10:03 PM

/dth vendors slot gloves

ISAC-01 - The Division2 Tracker BOT Today at 10:03 PM

Hi, [alexanderdth], scouting for: gloves, please wait...

Listing gear for slot: gloves

Found at: TheTheater
Name: Vambrace Gloves
Brand: Belstone Armory
Type: Gloves
Armor: 80k
Core: 128,497 Armor
Attributes: 8.2% Hazard Protection , 15,233 Health

Found at: DZWest
Name: Mirror Gloves
Brand: Negotiator's Dilemma
Type: Gloves
Armor: 80k
Core: 10.0% Weapon Damage
Attributes: 6.0% Weapon Handling

Found at: DZWest
Name: Tassar Fist Enhancers
Brand: Fenris Group AB
Type: Gloves
Armor: 80k
Core: 14.8% Weapon Damage
Attributes: 4.1% Headshot Damage , 6.9% Explosive Resistance

Found at: Cassie
Name: Ross Hand Protectors
Brand: True Patriot
Type: Gloves
Armor: 80k
Core: 134,852 Armor
Attributes: 16,523 Health

Now we can move on to vendor searching. It's sort of like Google, but for vendors. Vendor searching searches by gear / weapon name AND NOT BY brand or TYPE or SLOT. We got commands for these as well. The command looks like this:

- /dth vendors search <insert-keyword>

Let's search for Everyday Carrier:

- /dth vendors search everyday
- /dth vendors search "everyday carrier"

**alexanderdth** Today at 9:56 PM
/dth vendors search everyday

**ISAC-01 - The Division2 Tracker** BOT Today at 9:56 PM

Hi, [alexanderdth], running vendor search, please wait...

Gear found for: everyday

Found at: Countdown
Name: Everyday Carrier
Brand: Belstone Armory
Type: Chest
Armor: 158k
Core: 143,127 Armor
Attributes: 8.5% Skill Damage , 8.8% Hazard Protection
Talents: Perfect Efficient

Found at: Cassie
Name: Everyday Carrier
Brand: Belstone Armory
Type: Chest
Armor: 158k
Core: 143,127 Armor
Attributes: 8.5% Skill Damage , 8.8% Hazard Protection
Talents: Perfect Efficient

Unable to find weapons.

Let's find a weapon:

alexanderdth Today at 9:58 PM

/dth vendors search "Military M870"

ISAC-01 - The Division2 Tracker BOT Today at 9:58 PM

Hi, [alexanderdth], running vendor search, please wait...

Unable to find gear for your query.

Weapons found for: military m870

Found at: TheTheater
Name: Military M870
Damage: 695,775
RPM: 75
Attributes: 11.3% Shotgun Damage, 9% Damage to Armor, 9.5% Magazine Size
Talent: Preservation

We can also search for weapons / gear that have some talent you need:

- /dth vendors talent <insert-talent-name>

Say I want to find something with "efficient" on. No problem:

- /dth vendors talent efficient

alexanderdth Today at 10:01 PM
`/dth vendors talent efficient`

ISAC-01 - The Division2 Tracker BOT Today at 10:01 PM

Hi, [alexanderdth], running vendor search, please wait...

Gear with talent: efficient

Found at: Countdown
Name: Everyday Carrier
Brand: Belstone Armory
Type: Chest
Armor: 158k
Core: 143,127 Armor
Attributes: 8.5% Skill Damage , 8.8% Hazard Protection
Talents: Perfect Efficient

Found at: Cassie
Name: Everyday Carrier
Brand: Belstone Armory
Type: Chest
Armor: 158k
Core: 143,127 Armor
Attributes: 8.5% Skill Damage , 8.8% Hazard Protection
Talents: Perfect Efficient

Brands you say? Say no more, we got it as well. If you wish to find gear that belongs to a certain brand. The command looks like this:

- `/dth vendors brand <insert-brand-here>` -> The requested parameter can be a simple keyword such as `badger` or the full thing: `badger tuff`

Let's give it a try:

- `/dth vendors brand "badger tuff"`

alexanderdth Today at 10:06 PM

/dth vendors brand "Badger Tuff"

ISAC-01 - The Division2 Tracker BOT Today at 10:06 PM

Hi, [alexanderdth], running vendor search, please wait...

Gear containing the brand: badger tuff

Found at: Benitez
Name: Long Range Pack Sett
Brand: Badger Tuff
Type: Backpack
Armor: 131k
Core: 134,056 Armor
Attributes: 3,960 Armor Regeneration , 16.4% Repair Skills
Talents: Energize

Found at: DZWest
Name: Knee Mesh Jonti
Brand: Badger Tuff
Type: Kneepads
Armor: 99k
Core: 124,235 Armor
Attributes: 13,331 Health , 12.0% Critical Hit Damage

Found at: DZSouth
Name: Winter Carryall Bergmann
Brand: Badger Tuff
Type: Backpack
Armor: 131k
Core: 119,795 Armor
Attributes: 7.1% Explosive Resistance , 15.5% Repair Skills
Talents: Versatile

Say I want Fenris, now:

- /dth vendors brand fenris

alexanderdth Today at 10:07 PM

/dth vendors brand fenris

ISAC-01 - The Division2 Tracker BOT Today at 10:07 PM

Hi, [alexanderdth], running vendor search, please wait...

Gear containing the brand: fenris

Found at: Clan
Name: Knäskydd Knee Protectors
Brand: Fenris Group AB
Type: Kneepads
Armor: 99k
Core: 12.6% Weapon Damage
Attributes: 10.6% Critical Hit Damage , 8.4% Skill Damage

Found at: DZWest
Name: Tassar Fist Enhancers
Brand: Fenris Group AB
Type: Gloves
Armor: 80k
Core: 14.8% Weapon Damage
Attributes: 4.1% Headshot Damage , 6.9% Explosive Resistance

Quite easy. Now we land to our last category: `mods`. The command is simple and it requires just a keyword:

- `/dth vendors mods <insert-keyword>`

For example, say I need some skill haste mods:

- `/dth vendors mods "skill haste"`

alexanderdth Today at 10:08 PM
/dth vendors mods "skill haste"

ISAC-01 - The Division2 Tracker BOT Today at 10:08 PM

Hi, [alexanderdth], scouting for: skill haste, please wait...

Listing mods for: skill haste

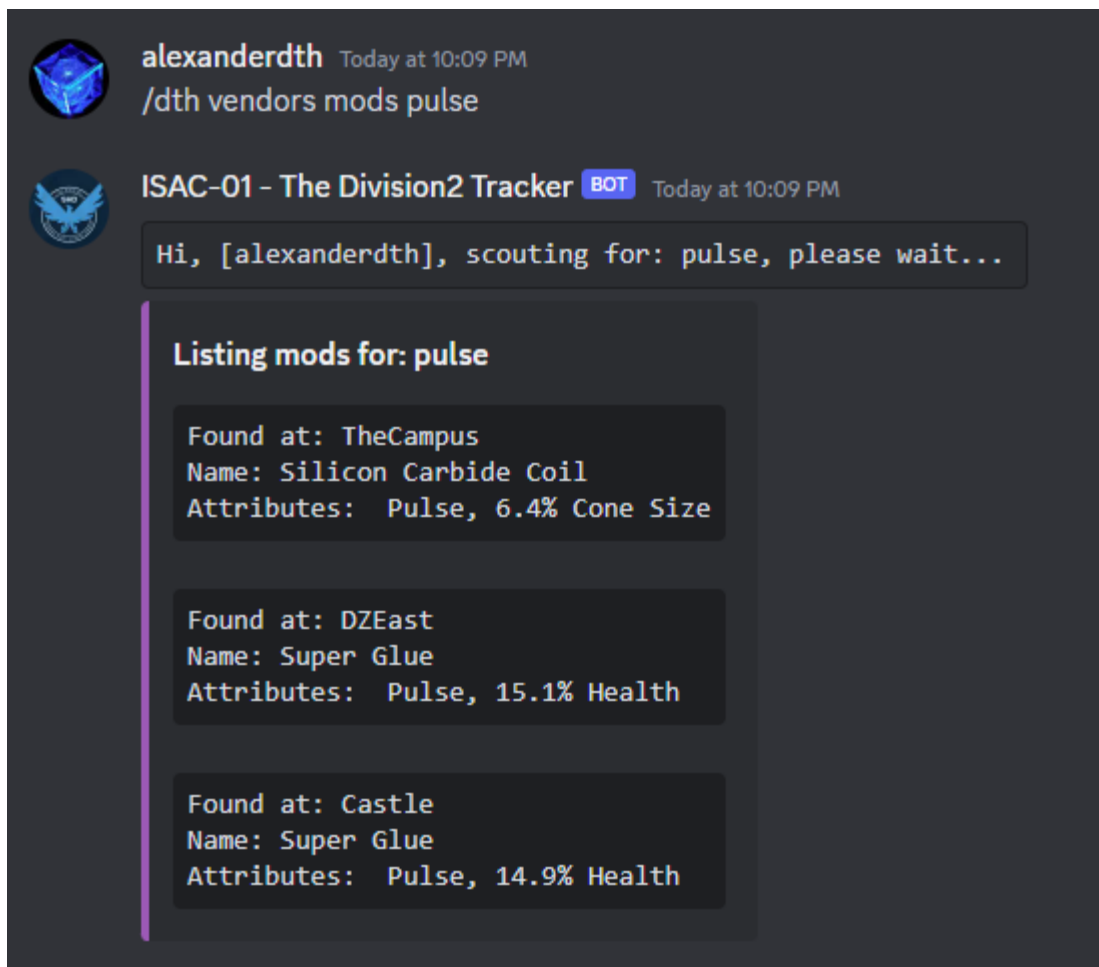

Found at: WhiteHouse
Name: Improved Sticky Launcher
Attributes: Sticky Bomb, 4.1% Skill Haste

Found at: DZEast
Name: Utility System: Assist
Attributes: 10.3% Skill Haste

Found at: DZSouth
Name: SHD CPU V.2
Attributes: Turret, 6.1% Skill Haste

Let's see if there are some pulse mods:

- /dth vendors mods pulse

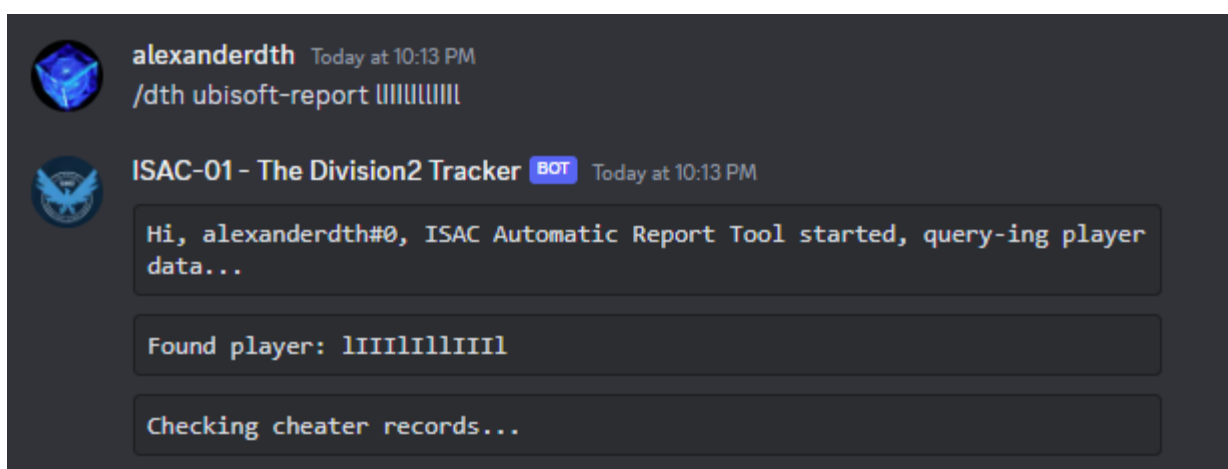

22. Ubisoft Report

/dth ubisoft-report <insert-cheater-here>, is a command that came later this year. It's purpose is to use the data we have on cheater and submit it directly to Ubisoft. Basically, you do not have to login to Ubisoft, create a ticket, paste data, write stuff and so on. It does it for you in 2 seconds.

The conditions for this are simple:

- Player must be a confirmed cheater in ISAC 2.0
- Player must have evidence linked to their profile

Let's put it to the test:

Confirmed cheater. Fetching relevant evidence and sending request...

ISAC 2.0 Automatic Ubisoft Report Tool

This tool sends a report directly to Ubisoft with relevant data for them to review.

Notice

This report is a direct channel of communication to Ubisoft Connect Services.

Message Sent to Ubisoft

ISAC 2.0 Player Tracker Automatic Report System.

Greetings!

This is message was submitted automatically by our discord community.

This message was sent by:

- Discord User: alexanderdth#0
- Discord Server: direct_message

Game: Tom Clancy's The Division 2

Cheater Information:

- Player Identifier / Uplay ID: ef0f9ee5-02c5-4703-8eac-0b5a6d89ccc5
- Current Username: llllllllll
- Username History: llllllllll, HvH.....
- Legacy / Pre-ISAC Usernames: not_found

Please keep in mind that you might see a different username in the videos, hence why we provided a list of usernames to match the videos.

This is normal, as players change usernames all the time to avoid bans.

This evidence has been verified thoroughly by the ISAC Staff, no false positives here.

We hope we will get justice for this kind of behaviour.

Thank you!

Result

Thank you, agent! Your report was submitted succesfully.
